Board-Certified Cardiologist

General Cardiology • Nuclear Cardiology • Adult Echocardiography

ACC • ACP • ACOI

How It Works

1

Answer Questions
Age, BP, cholesterol, lifestyle — takes about 3-5 minutes

2

Get Your Scores
ASCVD 10-year risk, Framingham, and more — calculated instantly

3

Read Your Report
AI explains what your numbers mean in plain English

Design notes: The hero CTA drives users directly to the free risk assessment (the acquisition funnel). Dr. Chen's credentials and photo are prominent for E-E-A-T trust signals. The "How It Works" section reduces friction by showing the process is quick and free.

Risk Assessment Questionnaire

A multi-step form collecting the inputs needed for ASCVD, Framingham, and CHA₂DS₂-VASc risk calculators. Designed to feel approachable, not clinical.

https://hearthealthai.com/assess

HeartHealth AI

Step 2 of 5

Blood Pressure & Cholesterol

Enter the most recent values you have. Estimates are okay — your doctor can provide exact numbers.

Systolic Blood Pressure (top number)

e.g. 130

The top number on your BP reading (mmHg)

Diastolic Blood Pressure (bottom number)

e.g. 85

The bottom number on your BP reading (mmHg)

Total Cholesterol

e.g. 210

From your most recent blood work (mg/dL)

HDL Cholesterol ("good" cholesterol)

e.g. 55

From your most recent blood work (mg/dL)

Are you currently taking blood pressure medication?

Yes

No

Not sure

☐ Don't have these numbers handy? You can skip this step and still get a partial assessment, or check your patient portal for recent lab results.

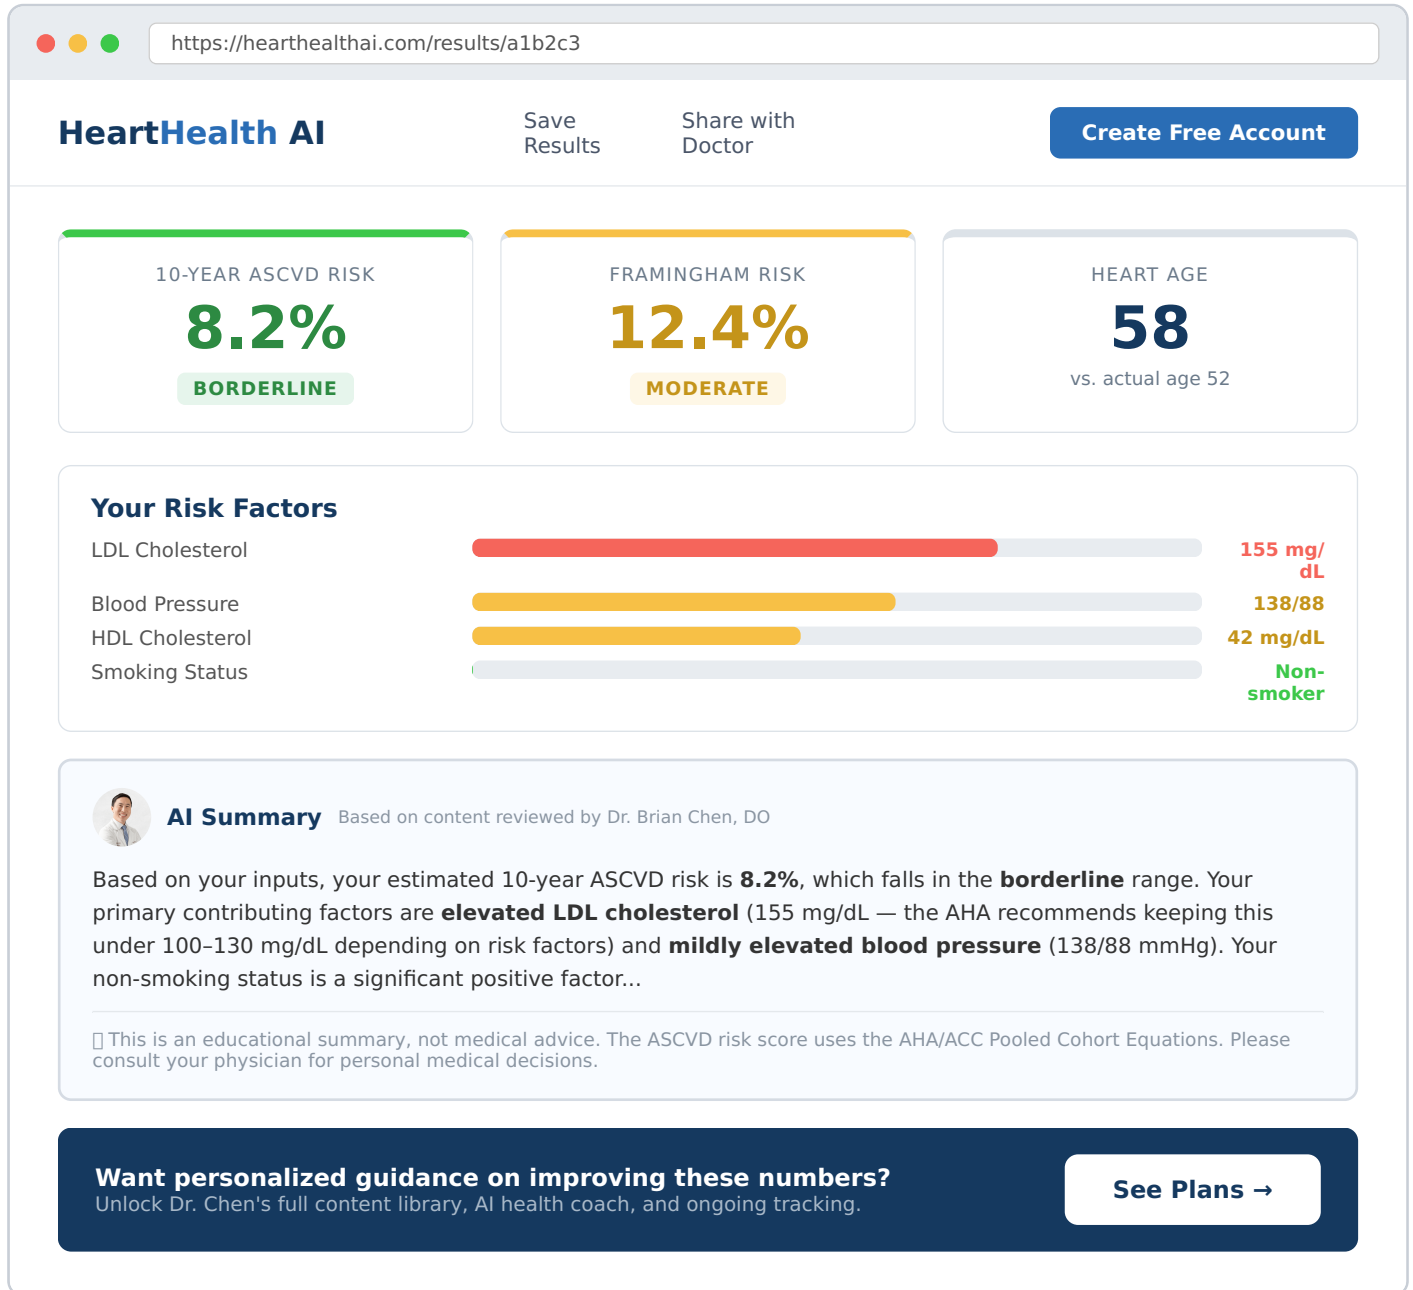

← Back

Continue →

Design notes: The 5-step wizard keeps each page focused and less intimidating than a single long form. Helper text explains medical terms in plain language. "Not sure" options prevent users from abandoning when they don't know a value. Progress bar gives clear position feedback.

Results Dashboard

Where users see their calculated risk scores and AI-generated educational summary. This is also the conversion point — where free users are prompted to create an account or upgrade.

Design notes: Score cards use color-coded borders (green/yellow/red) for quick visual comprehension. The AI summary is attributed to Dr. Chen's reviewed content with a clear disclaimer. The upsell banner is contextual — "your cholesterol is high → here's where to learn more" — not generic.

Content Library (Subscription)

The subscriber-only content hub with Dr. Chen's video lessons, written guides, and topic categories. This is the core retention driver.

Understanding Your Nuclear Stress Test Results

What the images show, what "normal" and "abnormal" mean, and when to ask follow-up questions.

 Dr. Brian Chen, DO

VIDEO • 12 MIN

Echocardiogram Results Explained

EF, valvular function, chamber sizes — what all those numbers on your echo report actually mean.

 Dr. Brian Chen, DO

GUIDE • 10 MIN READ

Statins: Evidence, Side Effects & What to Ask Your Doctor

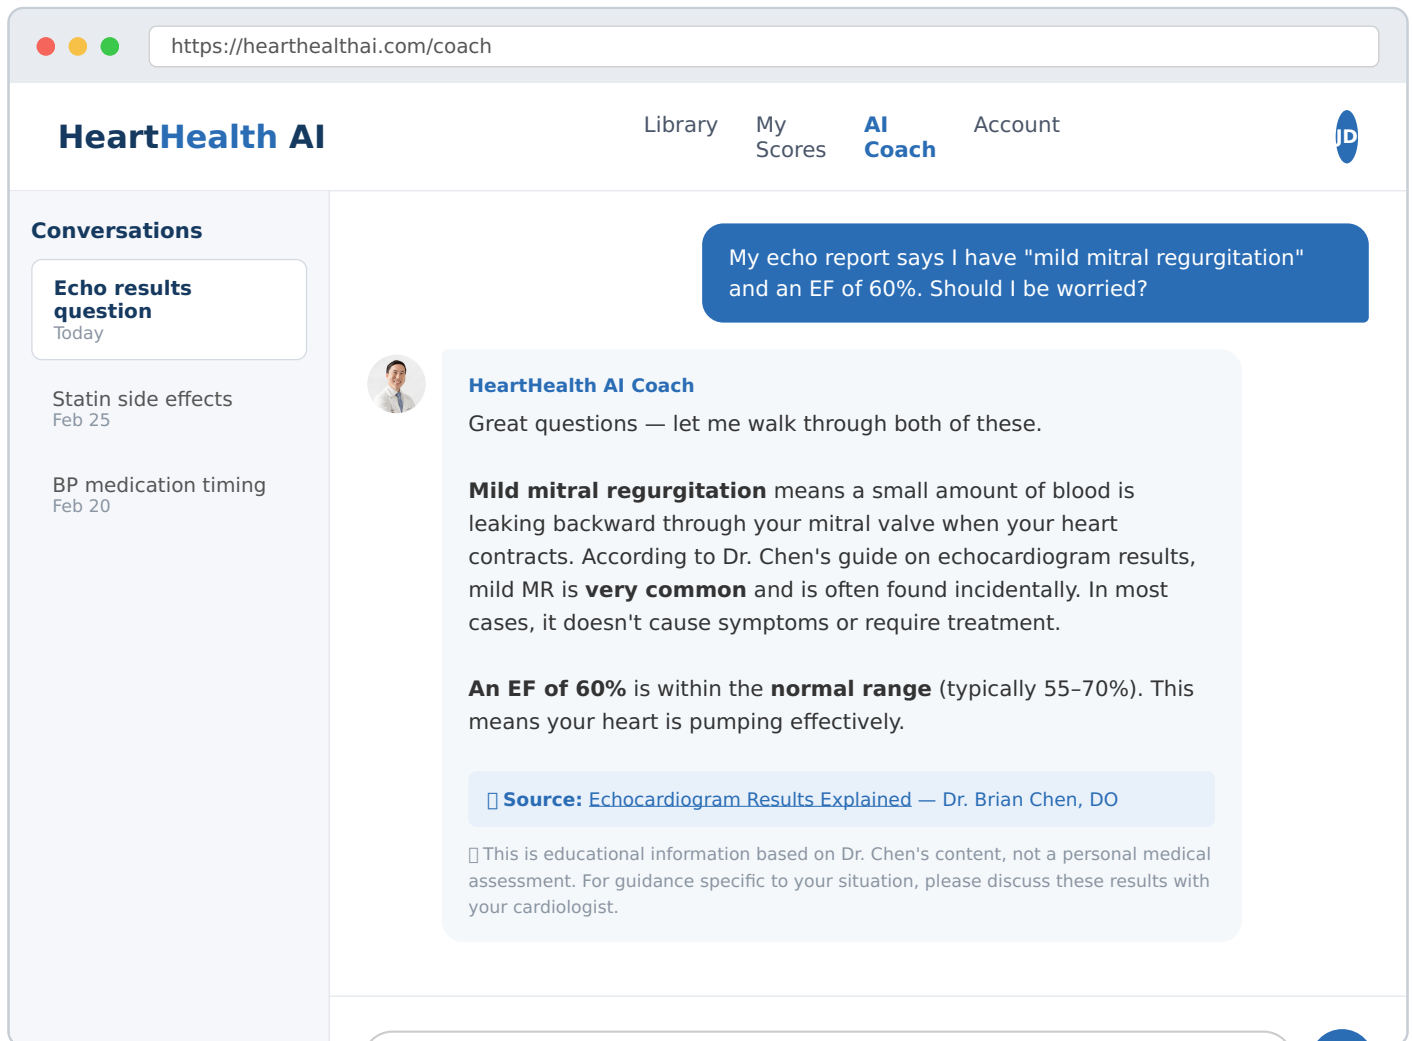

An evidence-based look at when statins help, common concerns, and how to have the conversation.

 Dr. Brian Chen, DO

Design notes: Topic filter pills let users find content relevant to their condition. Every piece prominently shows Dr. Chen as the author. Video and written guides are intermixed. The "Test Results" category leverages Dr. Chen's nuclear/echo board certifications — the unique SEO opportunity.

AI Health Coach (Chat)

The RAG-powered chatbot that answers subscriber questions grounded in Dr. Chen's curated content. Every response cites its source and includes safety guardrails.

Design notes: Every AI response cites the specific Dr. Chen content it drew from (the blue source box). The disclaimer is present on every response. Dr. Chen's photo next to responses reinforces that answers are grounded in his expertise. Conversation history in the sidebar lets users return to past topics.

Pricing Page

Clear tier comparison with a free option to reduce friction. Stripe Checkout handles all payment processing.

Content by Dr. Brian Chen, DO

Design notes: Three clear tiers — Free (acquisition), Premium Monthly (primary revenue), Detailed Report (one-time for users who don't want subscriptions). The "Most Popular" badge on Premium uses a proven conversion pattern. Stripe handles all payment — we never touch card data. Trust signals (secure payments, cancel anytime, Dr. Chen attribution) reduce purchase hesitation.
